Dynamics 365 Business Central Integration

Integrating Microsoft Dynamics 365 Business Central with business software

codeless PLATFORMS

Microsoft Dynamics 365 Business Central Integration

Microsoft Dynamics 365 BC is a feature-packed ERP system, designed to streamline, consolidate and manage critical business information in one platform. Integrating Dynamics 365 BC with other business systems will help will eradicate repetitive data entry, improve business efficiency and reduce costs.

The Problem

Microsoft Dynamics 365 BC is a powerful ERP solution providing the majority of requirements that businesses need. However, to ensure that everyone has full visibility of essential data it needs to be integrated with other cloud-based or on-premises business solutions.

The Solution & Commercial Benefits

Codeless Platforms' Dynamics 365 Business Central Connector can quickly and simply integrate Dynamics 365 Business Central through its drag and drop integration tools and then automate the transfer of data.

- Quickly and easily facilitate two-way integrations
- Increase the visibility of critical data
- Improve decision making
- Eradicate repetitive administration and associated errors

Microsoft Dynamics 365 Business Central Integration

Integrating Dynamics 365 BC with other systems and services

Microsoft Dynamics 365 BC is an extremely comprehensive product, providing a range of functionality that companies require. However, if you are using an additional third-party system, such as accounting, CRM, eCommerce or warehouse management system, then Codeless Platforms' Dynamics 365 BC Connector can quickly and easily provide the integration between them.

The Connector can also be used to integrate with tertiary software and web-based services such as courier and despatch companies, payment services, communication tools (email, SMS, marketing), supplier databases, credit checking services and data suppliers etc.

Business process automation across multiple systems

Once your business systems are integrated, Codeless Platforms' Dynamics 365 BC Connector can automate a wide-range of repetitive business processes that are unique to your business.

Data can be automatically transferred between systems, such as customer data, orders, payments and reports, providing Dynamics 365 BC with the most relevant, up-to-date information required, This helps to improve business efficiency and reduce costs. Automated notifications, via email and SMS, can also be added to the system, providing the ability to automate the distribution of order status updates, stock level warnings and delivery alerts etc.

Automating workflow processes starting outside Dynamics 365 BC

Dynamics 365 BC is a comprehensive business management system that provides users with full visibility of their workflow processes. Yet, if a workflow process starts or ends outside of Dynamics 365 BC users are not automatically included in the management or contribution process.

Codeless Platforms' connector and its multi system, bi-directional workflow capabilities enable organisations using Dynamics 365 Business Central to quickly create workflows that start or end outside of Dynamics 365 Business Central. This ensures users have the ability to contribute to decisions regardless of where a workflow begins or ends.
