PrestaShop Integration

By integrating PrestaShop with your business software you will eradicate repetitive employee data entry, remove the risk of costly errors and significantly decrease order fulfilment times. What are you waiting for? eCommerce doesn't have to be painful.
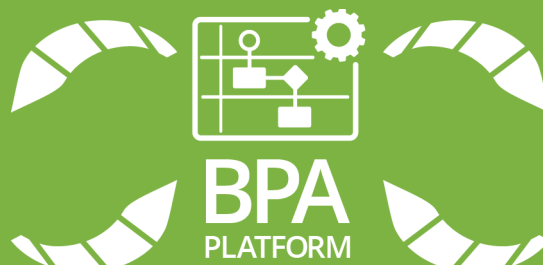

⚠ The Problem

PrestaShop is a powerful eCommerce solution that is used by organisations worldwide but it still needs people to extract its data and rekey that information into business software. Employees also extract data from business software and rekey that into PrestaShop. This takes time, is error prone and is an unnecessary cost.

☑ The Solution & Commercial Benefits

Codeless Platforms' PrestaShop Connector automates the flow of information between PrestaShop and your business software.

- Eradication of repetitive data entry and associated human errors
- Significant reduction in order fulfilment times
- Reduction in operational costs and the need to recruit seasonal employees at peak times

PrestaShop Integration

Pulling PrestaShop orders into business systems

It's been a busy day, you've just taken 300 orders in PrestaShop. Sadly, some time starved employee has had to extract these orders from PrestaShop and manually rekey the data into your business software.

Codeless Platforms' BPA Platform is a market proven solution that automatically extracts data from PrestaShop and seamlessly enters this into your business software. No need to rekey orders. It really is that simple for our customers.

Pushing order statuses & more into PrestaShop

Everyone involved with eCommerce understands that data also needs to be pushed up. Data such as order statuses, new products, stock level changes, delivery tracking numbers etc. all need to be manually entered into PrestaShop.

Codeless Platforms' solution will automatically extract data such as new products and images, stock availability levels, order statuses etc from the relevant sources and push that straight back into PrestaShop. No employee administration required.

Integrating PrestaShop with courier services

So, you've manually rekeyed all orders taken in PrestaShop into your business software but you are now faced with the task of placing them with your preferred courier service(s). More costly administration for you and your employees.

Codeless Platforms' solution will automatically take orders from your business software (not forgetting that it can automatically insert orders in there in the first place) and place them with your courier service provider. It will also automatically print the labels out for your despatch team to process. More time saved via automation.
